

To be straight, I move to dismiss this petition for the fact that it is a fairytale.

QUOTE: "Unlike other forms of modulation, the CW mode is fully 100% efficient in that 100% of the radio frequency energy generated, is converted into intelligence"

There is no radio device 100% efficient, and RF energy has no intelligence of it's own entity. This type of petition should never have been taken seriously.

Thank You
